RUGGEDCOM WIN

Features and benefits

Standards based

- Based on the IEEE 802.16e family of standards and third party validated to support interoperability with other vendors.

Standalone mode

- Unique capability that allows RUGGEDCOM WIN products to operate without external servers, reducing initial capital outlay significantly, while maintaining features such as GOOSE over the air and mobility.

Range/throughput

- The RUGGEDCOM WIN product family has built-in mechanisms to ensure the system is delivering maximum bandwidth for a given distance/coverage requirement at all times.

Scale

- RUGGEDCOM WIN has been designed to cover vast territories with embedded GPS or IEEE1588 synchronization options to reduce self-interference and maximize frequency reuse.

Quality of service

- RUGGEDCOM WIN has built-in quality of service to enable operators to guarantee latency throughout a mix of IT and OT applications.

Security

- The RUGGEDCOM WIN product family has the security feature set to enable organizations that provide critical infrastructure to be compliant with legal mandates and security guidelines.

Mobility

- The RUGGEDCOM WIN product line is capable of maintaining session persistence with real time applications in a mobility environment at vehicular speeds.

RUGGEDCOM WIN base stations

The RUGGEDCOM WIN7000 and RUGGEDCOM WIN7200 base stations are powered by OFDMA radio technology, which is robust in adverse environmental conditions and enables Non-Line-Of-Sight (NLOS) operation. Leveraging link adaptation algorithms, modulation and coding are continuously adapted to prevailing link conditions, ensuring an optimal balance between robustness and efficiency.

Mobile WiMAX compliance

- Based on IEEE 802.16e standard and WiMAX Forum Wave2 (MIMO) certification

Rated for harsh environments

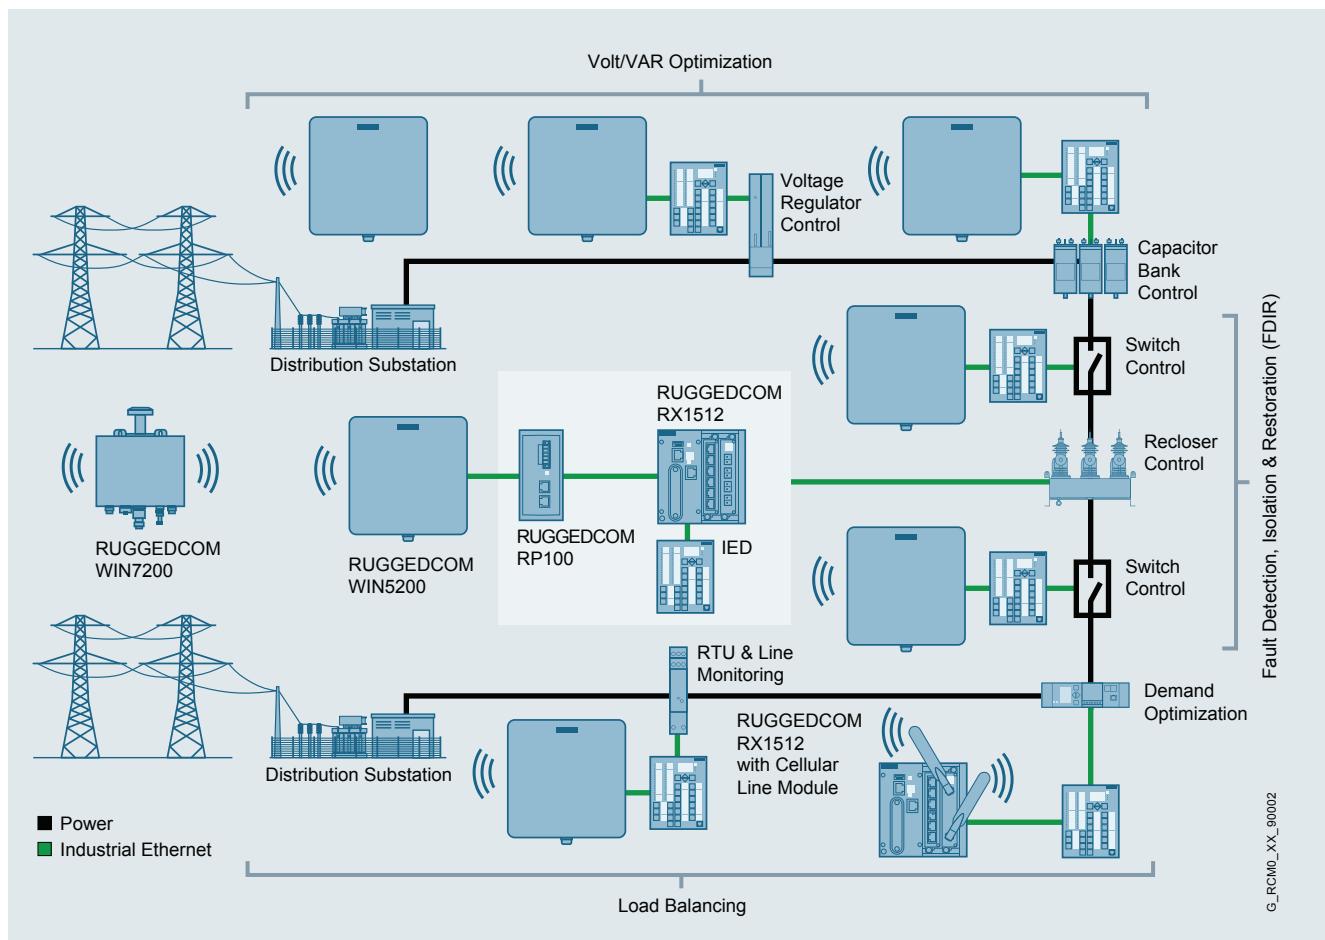

- IEEE 1613, IEC 61850-3, Class 1 Div 2 / ATEX Zone 2, MIL-STD 810F, MIL-STD 509.4 – salt fog
- 40° C to +75° C temperature range

Range

- Transmit and receive diversity combined with high power for improved reach and NLOS performance

High bandwidth

- RUGGEDCOM WIN has two built-in radios operating on the same frequency simultaneously (MIMO) to increase bandwidth (up to 40 Mbps) and spectral efficiency

Multi-service field area network for smart grid applications.

RUGGEDCOM WIN7000 high power base station

The RUGGEDCOM WIN7000 is a high power, broadband wireless base station, compliant to the IEEE 802.16e standard, designed for long range deployments in licensed frequency bands in harsh environments.

Available in a number of different frequency bands, the RUGGEDCOM WIN7000 has been designed around delivering maximum coverage where regulations permit high power operation. The single sector design can accommodate as many sectors as required at a given site, driven by coverage, bandwidth and subscriber density considerations.

RUGGEDCOM WIN7200 standard power base station

The RUGGEDCOM WIN7200 is a lightweight broadband wireless base station, compliant with the IEEE 802.16e standard, also supporting unlicensed frequency bands in harsh environments.

The RUGGEDCOM WIN7200 is a single sector lightweight base station that can be easily installed on poles, street lamps or walls, and provides connectivity to fixed or mobile end points. Connected via a single Power-over-Ethernet (PoE) connection and easily provisioned, the RUGGEDCOM WIN7200 reduces operational cost and complexity.

Specifications	RUGGEDCOM WIN7000	RUGGEDCOM WIN7200
Support of worldwide WiMAX deployments	1.X, 2.X and 3.X GHz bands	2.5,3.5,4.9,5.1,5.8 GHz bands
Flexible configurations	Dual PoE or fiber optic interfaces	Single PoE interfaces
Power output	2 x 36 dBm output power	2 x 27 dBm output power for 2.X GHz and 3.X GHz 2 x 24 dBm output power for 4.9 GHz and 5.1 GHz 2 x 21 dBm output power for 5.8 GHz
Width	290 mm (11.42 in)	257 mm (10.12 in)
Height	756 mm (29.76 in)	228 mm (8.98 in)
Depth	195 mm (7.68 in)	112 mm (4.41 in)
Net weight	15 kg (33.1 lb)	3 kg (6.6 lbs)
Maximum subscribers supported	128	64

RUGGEDCOM WIN subscriber units

RUGGEDCOM WIN5100 vehicular subscriber unit

The RUGGEDCOM WIN5100 is a broadband wireless subscriber unit, compliant with the IEEE 802.16e standard, with external RF connectors for use in fixed or mobile applications in harsh environments.

The self-learning subscriber device automatically detects the base station on the best signal available, allowing for plug-and-play installation and maintenance-free operation. RUGGEDCOM WIN5100 comes with external antenna connectors and can be ordered with an optional 10 – 30 VDC input.

RUGGEDCOM WIN5100-V enhanced vehicular subscriber unit

The RUGGEDCOM WIN5100-V is built to sustain shock and vibration to comply with heavy rail industry certifications. With external M12 RF connectors and M12 DC power connector, this subscriber unit can be installed on mobile tractors and trucks, or in fixed locations susceptible to vibration such as runways.

The RUGGEDCOM WIN5100-V supports 9-36 VDC and comes with an optional GPS receiver which allows accurate location sharing with devices behind the subscriber unit or over-the-air, using 802.16e protocol.

Specifications	RUGGEDCOM WIN5100	RUGGEDCOM WIN5100-V	RUGGEDCOM WIN5200
Antenna	2 N-type antenna connectors for connection to external omni or directional antenna	2 N-type antenna connectors for connection to external omni or directional antenna	High gain integrated antenna
Flexible configurations	Designed for vehicular, cabinet or pole top installations	Designed for vehicular, cabinet or pole top installations	Designed for pole top installations
Power supply	PoE or Direct +/-12 to 24 VDC input	PoE or Direct +/-12 to 24 VDC input	Single cable Power-over-Ethernet (PoE)
Integrated GPS	No	Optional	No
Width	226 mm (8.9 in)	255 mm (10 in)	300 mm (11.8 in)
Height	80 mm (3.15 in)	92 mm (3.62 in)	310 mm (12.2 in)
Depth	92 mm (3.62 in)	108 mm (4.25 in)	91 mm (3.58 in)
Net weight	1.1 kg (2.4 lb)	1.2 kg (2.6 lb)	1.8 kg (4 lb)

RUGGEDCOM WIN5200 outdoor subscriber unit

The RUGGEDCOM WIN5200 is a broadband wireless subscriber unit, compliant with the IEEE 802.16e standard, with a built-in directional antenna for use in harsh environments.

The RUGGEDCOM WIN5200 greatly simplifies installation with LEDs for signal strength alignment, automatic connection to strongest serving base station and automated service provisioning, based on authentication credentials. Specifically designed for point-to-multipoint broadband wireless access applications, the RUGGEDCOM WIN5200 provides efficient use of the wireless spectrum, supporting a range of applications.

Excellent performance in NLOS conditions

- Overcoming multipath and deep fading, providing extended range and easy installation

Automatic Transmit Power Control (ATPC)

- Optimal network deployment, tight frequency reuse, and interference avoidance

Numerous applications and services

- Guaranteed data, VoIP, video and other services based on advanced QoS

Robust hardware

- -40° C to +75° C temperature range

Global availability

- Wide frequency band support for deployments around the world

RUGGEDCOM power injectors

RUGGEDCOM RP100 & RP110

The RUGGEDCOM RP100 & RP110 are single port 802.3at Power-over-Ethernet injectors that provide the flexibility to power remote PoE devices using standard Cat 5 cable.

Compatible with the latest 802.3at high-power PoE standard and backward compatible with low-power 802.3af PoE devices, the RUGGEDCOM RP100 family provides versatility and investment protection to handle future demands for increased power.

The RUGGEDCOM RP110 is a serial 802.3at Power-over-Ethernet injector with a built-in serial server, designed to bridge legacy serial devices onto an IP network and to power remote PoE devices, using standard Cat 5 cable.

Features

- Configuration-free, plug and play operation
- 802.3at/af-compliant or RM version for connection to RUGGEDCOM WIN products

- Rugged Rated, -40° C to +85° C temperature range
- IEEE 1613 and IEC 61850-3 compliance means continued operation in harsh environments
- Supports a wide range of AC and DC input voltages
- Space-saving compact DIN rail design
- Reduces cabling, connection, and power supply requirements for PoE devices
- Rated for 12, 24 – 48 VDC, 100 – 240 VAC, 125 – 250 VDC

Serial Server

The RUGGEDCOM RP110 comes with an integrated serial server and includes a subset of the features of the ROS® operating system, including:

- Remote management and logging
- Serial IP encapsulation
- SNMP based network management
- Precision timing support
- 1 RS485/RS422 port and 1 independent RS232 port and 1 IRIG-B Output

Specifications	RUGGEDCOM RP100	RUGGEDCOM RP110
Width	226 mm (8.9 in)	226 mm (8.9 in)
Height	80 mm (3.15 in)	80 mm (3.15 in)
Depth	92 mm (3.62 in)	92 mm (3.62 in)
Net weight	1.5 kg (3.3 lbs)	1.5 kg (3.3 lbs)

AeroMACS

AeroMACS (Aeronautical Mobile Airport Communications System) is a new data link technology intended to support airport surface communications. This wireless technology is mandated by ICAO (International Civil Aviation Organization) and will be used for airport ground communications as well as for a safe, orderly, and expeditious flow of air traffic around the globe.

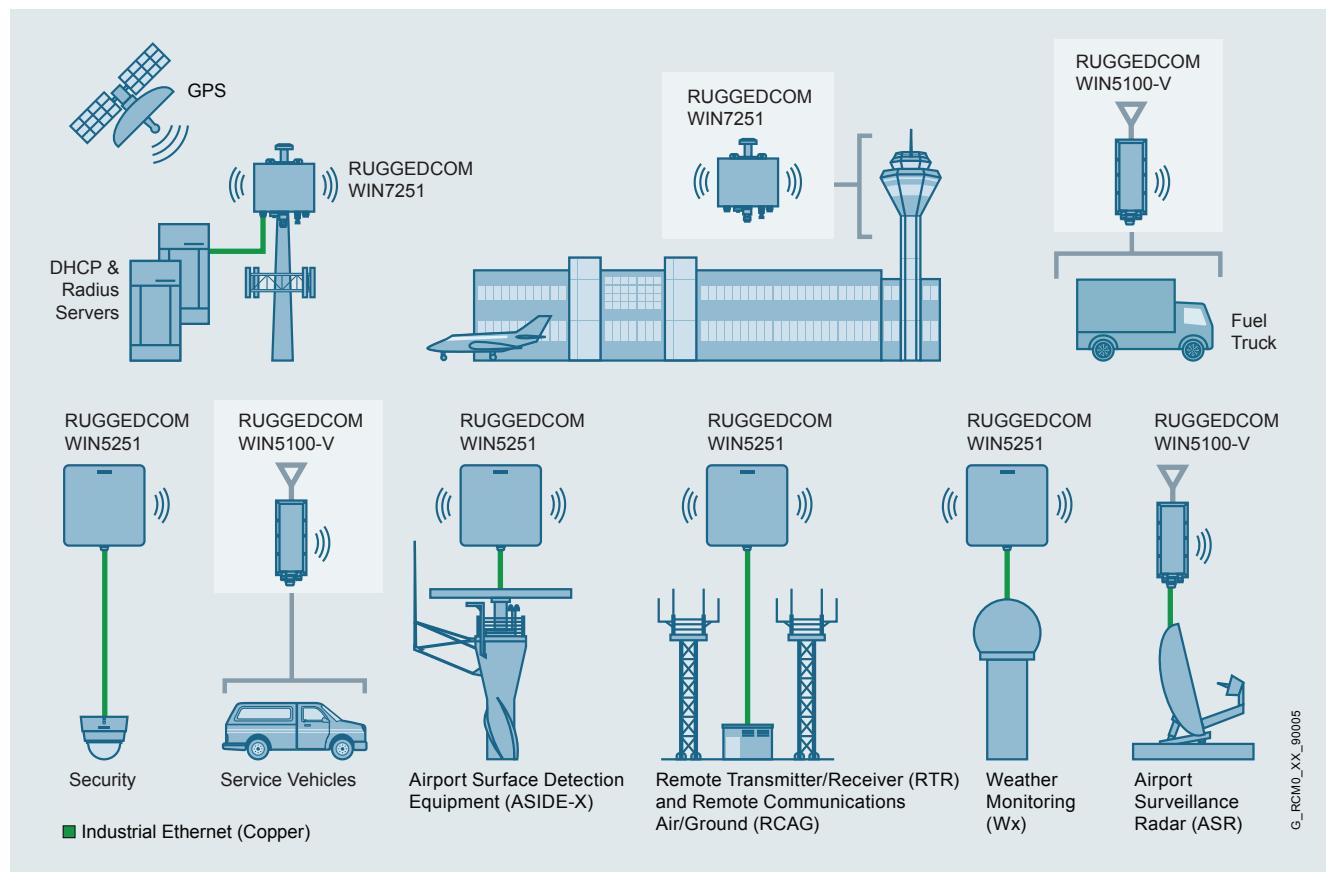

Using the 5000–5030 MHz and the 5091–5150 MHz band, allocated by the International Telecommunication Union, the RUGGEDCOM WIN products are optimized for AeroMACS based airport surface communications.

With the use of an all IP radio, RUGGEDCOM WIN products can be easily integrated in existing airport networks or future networks such as PENS (Pan European Network Services) in Europe, or SWIM (System Wide Information Management) in North America.

Siemens offers 4 products for setting up wireless networks in airports: the RUGGEDCOM WIN7251 base station, the WIN5251 pole-mounted subscriber unit, the WIN5151, and the WIN5151-V-GPS mobile subscriber units.

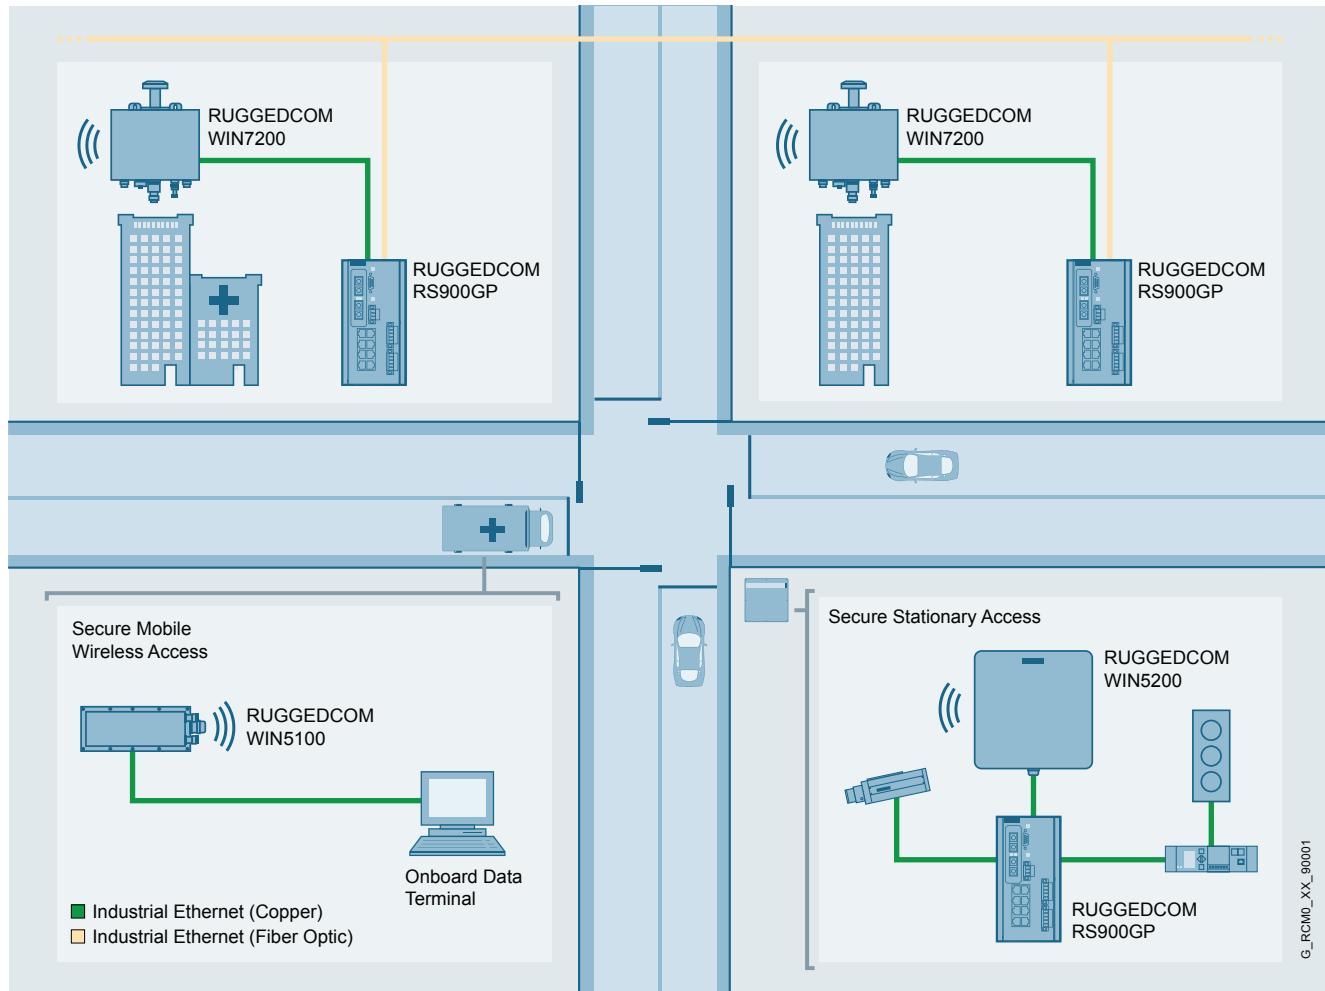

These products go beyond the AeroMACS standard feature set to provide the following additional functionality:

- Built-in ASN (Access Service Network) Gateway, with embedded management for routing and mobility in the base station
- Full Layer 2 deployment option, including encrypted multicast VLANs support
- IP-CS and ETH-CS co-existence
- Highly accurate NTP Server at the subscriber unit to synchronize end devices
- IEEE1588 synchronization support, with redundancy to GPS
- Extended cell range: coverage beyond the required 8 km and up to 40 km
- SNMP-V3 management system

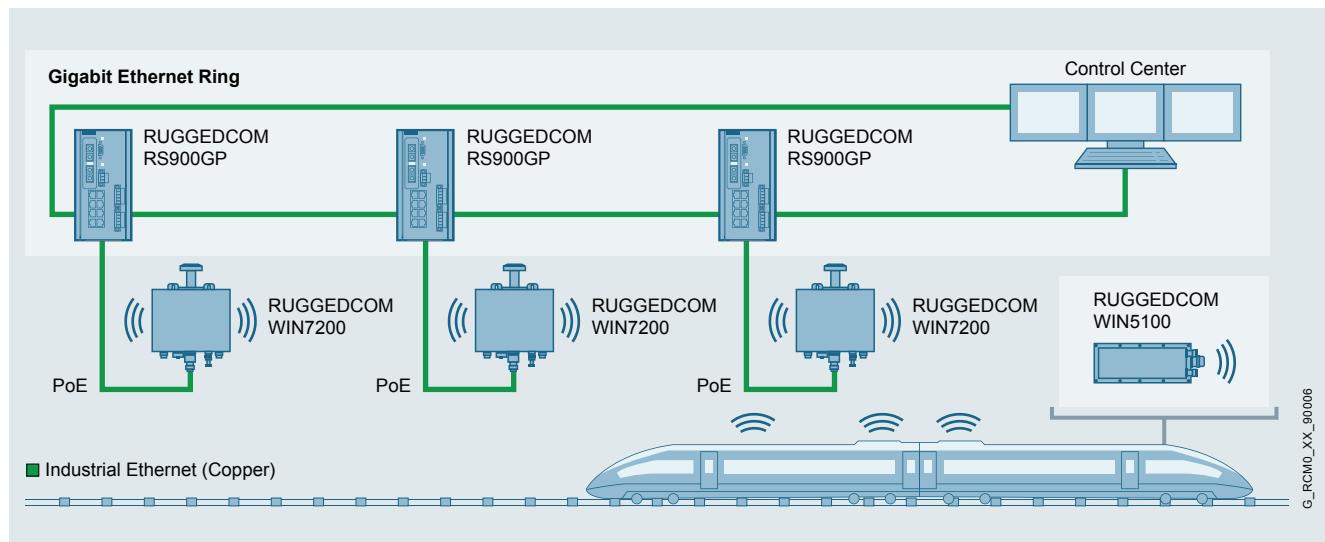

RUGGEDCOM WIN AeroMACS installation locations and applications in an airport.

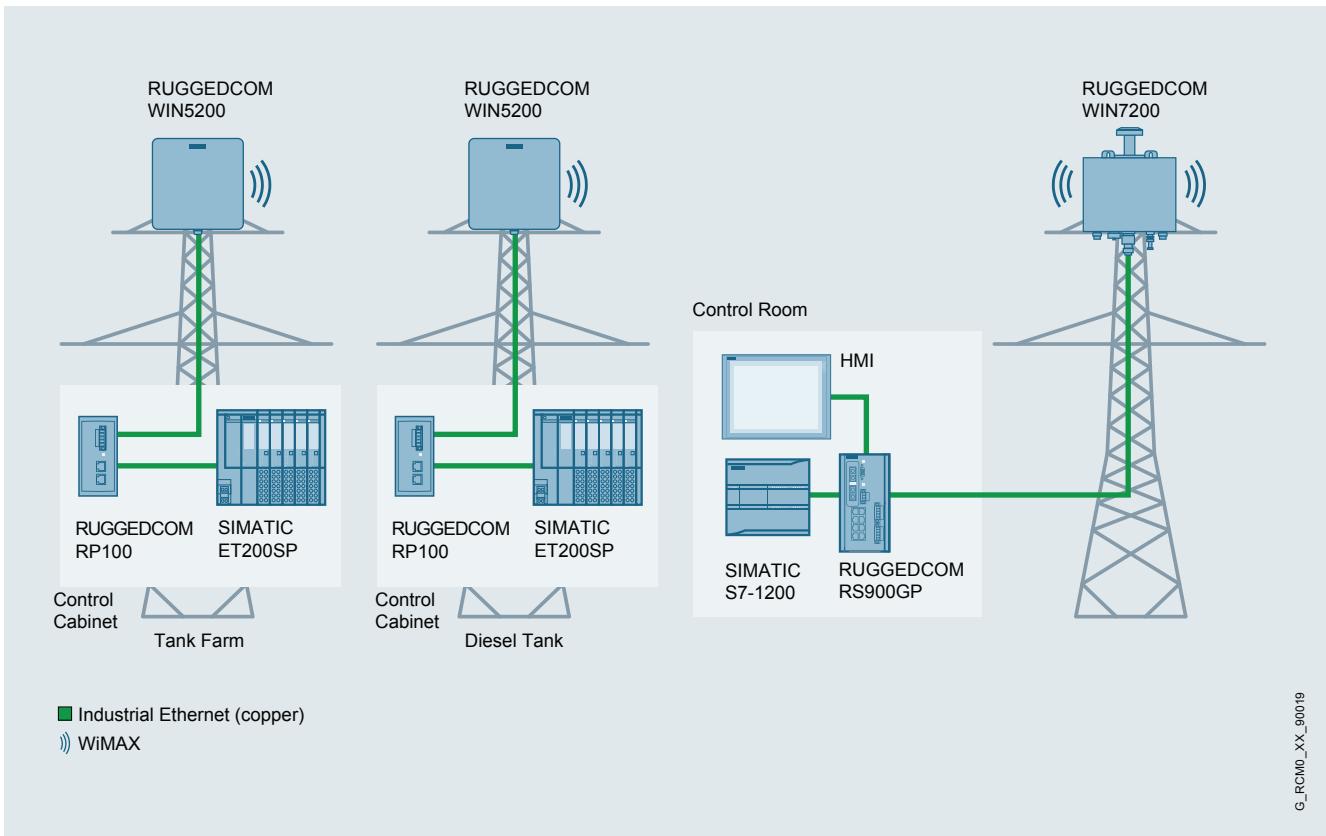

Use cases

Wireless broadband is widely used to enhance connectivity in the ITS industry.

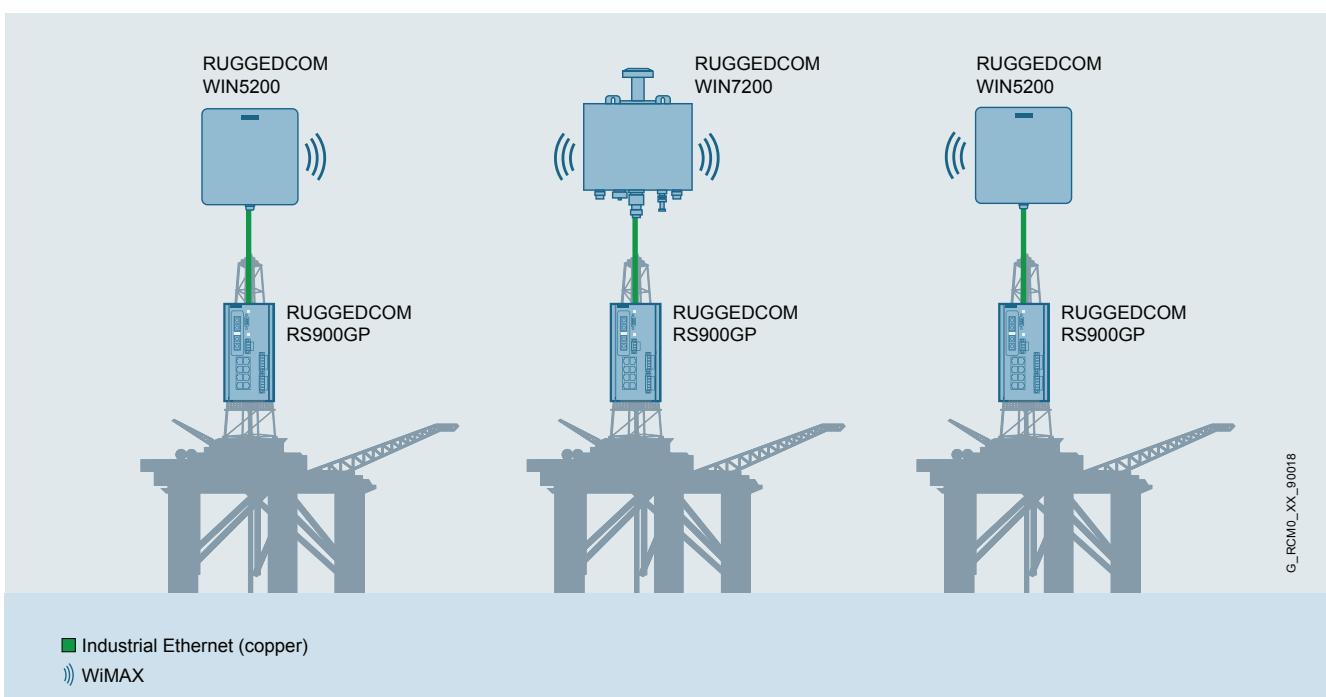

Fully integrated wireless solutions offer broadband data rates for the rail industry.

G_RCm0_xx_90019

PROFINET IO over wireless broadband for reliable monitoring of remote locations in the oil & gas industry.

G_RCm0_xx_90018

Offshore wireless long range monitoring and control of oil platforms.

Outdoor cable (Ethernet) for WIN5200 for +48 VDC – 45 m	RUM:CBWR0014-45M
Outdoor cable (Ethernet) for WIN5200 for +48 VDC – 60 m	RUM:CBWR0014-60M
Outdoor cable (Ethernet) for WIN5200 for +48 VDC – 75 m	RUM:CBWR0014-75M
Outdoor cable (Ethernet) for WIN5200 for +48 VDC – 90 m	RUM:CBWR0014-90M
Outdoor cable (Ethernet) for WIN5200 for +48 VDC – 500 m (batch for self-connectorization)	RUM:CBWR0014-500

RUGGEDCOM Power-over-Ethernet injector	Article number
RUGGEDCOM RP100	6GK6010-0AP0 . - . AA .
High voltage (85 – 264 VAC / 88 – 300 VDC), standard PoE (803.2at)	1 1
High voltage (85 – 264 VAC / 88 – 300 VDC), for RUGGEDCOM WIN only	1 2
Low voltage (10 – 60 VDC), standard PoE (803.2at)	2 1
Low voltage (10 – 60 VDC), for RUGGEDCOM WIN only	2 2
Manufacturing modification	
None	0
Conformal coating	1

RUGGEDCOM Power-over-Ethernet injector with built in serial server	Article number
RUGGEDCOM RP110NC	6GK6011-0AP2 . - . AA .
RUGGEDCOM RP110	6GK6011-0AP1 . - . AA .
High voltage (85 – 264 VAC / 88 – 300 VDC), for RUGGEDCOM WIN only	1 2
Low voltage (10 – 60 VDC), for RUGGEDCOM WIN only	2 2
Manufacturing modification	
None	0
Conformal coating	1

With the RUGGEDCOM Selector you can transfer the order number to the Siemens Industry Mall and order your products.

To use the RUGGEDCOM Selector for the selection and configuration of RUGGEDCOM products, visit: siemens.com/ruggedcom-selector

Security information

Siemens provides products and solutions with industrial security functions that support the secure operation of plants, systems, machines and networks.

In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial security concept. Siemens' products and solutions only form one element of such a concept.

Customer is responsible to prevent unauthorized access to its plants, systems, machines and networks. Systems, machines and components should only be connected to the enterprise network or the internet if and to the extent necessary and with appropriate security measures (e.g. use of firewalls and network segmentation) in place.

Additionally, Siemens' guidance on appropriate security measures should be taken into account. For more information about industrial security, please visit:
siemens.com/industrialsecurity

Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends to apply product updates as soon as available and to always use the latest product versions. Use of product versions that are no longer supported, and failure to apply latest updates may increase customer's exposure to cyber threats.

To stay informed about product updates, subscribe to the Siemens Industrial Security RSS Feed under:
siemens.com/industrialsecurity

The information provided in this brochure contains descriptions or characteristics of performance which in case of actual use do not always apply as described or which may change as a result of further development of the products. An obligation to provide the respective characteristics shall only exist if expressly agreed in the terms of contract. Availability and technical specifications are subject to change without notice. All product designations may be trademarks or product names of Siemens AG or supplier companies whose use by third parties for their own purposes could violate the rights of the owners.
